Date: February 06th, 2015

Supersedes: May 31, 2013

Official Statement

Ref #: **Sift E-1**

Sifting / Official Statement

Macco's products, including *calcium acetate*, *calcium propionate*, *potassium acetate*, *potassium benzoate*, *sodium acetate*, *sodium benzoate*, *sodium diacetate* and *sodium propionate*, manufactured at its Valleyfield facility, are the result of chemical syntheses.

The manufacturing processes are performed in *closed manufacturing systems* which incorporate the following elements to prevent physical contamination: inline *filters**, *sieves**, *super magnets** and *metal detectors** positioned before the packaging operation as described in our product process flow diagrams. Macco also incorporates a *glass, brittle plastic and ceramic policy* as well as a raw material and finished product *authorization and tracking system*.

Macco's manufacturing facility is a FDA bioterrorism, FSMA and C-TPAT registered facility that operates under an ISO 9001 Quality System, an FSSC 22000 ISO Food Safety System (GFSI approved) and in compliance with food GMP. Macco's facility is audited yearly.

* Reference to the AIB and to the Prerequisite Programs on Food Safety for Food Manufacturing PAS 220:2008 section 10.4 "Physical Contamination" (part of FSSC-22000).
