THE MANUFACTURING PROCESS OF THE PRODUCTS BELOW ARE COVERED BY A REGISTERED FSSC-22000 FOOD SAFETY SYSTEM

Date: March 28 th , 2018	Supersedes: February 14 th , 2018	Official Statement	Ref # : Sift E-1
-------------------------------------	--	--------------------	-------------------------

Sifting / Official Statement

Macco Organiques Inc.'s products, including *calcium acetate*, *calcium propionate*, *potassium acetate*, *potassium benzoate*, *sodium acetate*, *sodium benzoate*, *sodium diacetate* and *sodium propionate*, manufactured at its Salaberry-de-Valleyfield plant, are the result of chemical syntheses.

The manufacturing processes are performed in *closed manufacturing systems* which incorporate the following elements to prevent physical contamination: inline *filters**, *sieves**, *super magnets** and *metal detectors** positioned before the packaging operation as described in our product process flow diagrams. Macco also incorporates a *glass, brittle plastic and ceramic policy* as well as a raw material and finished product *authorization and tracking system*.

* Reference to the AIB and to the Prerequisite Programs on Food Safety for Food Manufacturing PAS 220:2008 section 10.4 "Physical Contamination" (part of FSSC-22000).

Macco's manufacturing facility is a FDA bioterrorism and C-TPAT registered facility that operates under an ISO Food Safety System FSSC 22000 (GFSI approved) and in compliance with food GMP. Pharmaceutical grade products are manufactured according to cGMPs. Macco's facility is audited yearly.
