

SAFETY DATA SHEET (SDS) (1272/2008/CE)

Trade Name:
POTASSIUM ACETATE

Edition: May 03, 2018
Version: 7/en

1. IDENTIFICATION OF THE SUBSTANCE / PREPARATION AND COMPANY / UNDERTAKING

Trade name	Potassium Acetate		
Synonyms	Potassium acetate; Acetic acid, potassium salt		
REACH registration number	01-2119486975-16-0016		
Recommended use and restriction on use	Use as a preservative in food, feed and pharmaceutical applications. Used as additive in industrial and laboratory applications. Use according to local regulations.		
Company	Macco Organiques Inc., 100 McArthur, suite 112, Salaberry-de-Valleyfield, Qc, Canada, J6S 4M5		
Responsible service	Tel: (450) 371-1066 macco@macco.ca	Fax: (450) 371-5519 http://www.macco.ca	
Emergency phone numbers	CANUTEC (613) 996-6666	CHEMTREC, U.S. (800) 424-9300	International (703) 527-3887

2. HAZARDS IDENTIFICATION

The substance is not classified as dangerous according to European Union (EU) directives 1272/2008, in replacement for 67/548/EEC including amendments and 1999/45/EC.

Classification	Not classified.
Labeling type instruction	This product does not require any labeling according to EU directives and regulations of the concerned country.
Other hazards	Combustible dust. May form explosive mixture with air.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Chemical name	Potassium acetate 100%
Synonyms	Potassium acetate; Acetic acid, potassium salt
Chemical formula	C ₂ H ₃ O ₂ K
CAS no.	127-08-2
EEC (CE) no.	E 261(i)
EINECS no.	204-822-2

4. FIRST-AID MEASURES

DESCRIPTION OF FIRST AID EMERGENCIES

General advices	In case of accident or illness, immediately get medical attention (show the label if possible). Show this safety data sheet to the physician. Remove and wash contaminated clothing before reusing.
Inhalation	If inhaled, move the person to fresh air. If not breathing, give artificial respiration. Get medical attention if any symptoms occur.
Skin contact	Rinse with water and wash with soap. Obtain medical attention if any symptoms occur.

SAFETY DATA SHEET (SDS) (1272/2008/CE)

Trade Name:
POTASSIUM ACETATE

Edition: May 03, 2018
Version: 7/en

Eye contact	In case of contact with eyes, rinse immediately with plenty of water. Obtain medical attention if any symptoms occur.
Ingestion	Rinse mouth with water. Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention if any symptoms occur.
POTENTIAL ACUTE HEALTH EFFECTS	
Inhalation	Not considered to be hazardous.
Ingestion	Not considered to be toxic.
Skin	Not considered to be hazardous.
Eyes	Not considered to be hazardous.
Potential chronic health effect	Carcinogenic effects: Not classified or listed by IARC, NTP, OSHA, EU and ACGIH. Mutagenic effects: No observed effects. Teratogenic effects: No observed effects.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.
Notes to physician	No specific antidote. Medical staff must contact a Poisons Information Center.
For more detailed information on health effects and symptoms, refer to section 11.	

5. FIRE-FIGHTING MEASURES

APPROPRIATE EXTINGUISHING MEDIA	
Suitable	Carbon dioxide (CO ₂) Water spray Foam Dry powder Use an extinguishing agent suitable for the surrounding fire. 650 kPa (6.5 bar;). Reference calcium acetate. 650 kPa (6.5 bar;). Reference calcium acetate.
Not suitable	None known.
Special exposure hazards	No specific hazard.
Risks associated with thermal decomposition products	Under fire conditions or above decomposition temperature, emits carbon monoxide, carbon dioxide, potassium carbonate and potassium oxide. Potassium acetate can burn if heated to decomposition.
Other fire-fighting measures	Fire residues and contaminated firefighting water must be disposed of according to local and national regulations.
Special protective equipment	Wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. For individual protection equipment, refer to section 8.
Special risks	Potassium acetate can burn if heated to decomposition. Similar to dust of most combustible compounds, under certain conditions the airborne dust of this substance may explode when ignited by a spark, flame or other ignition sources. When evaluating the explosion hazard potential for the material, consider particle shape and size, dust concentration, presence of impurities, oxygen concentration, humidity and extent of containment.

SAFETY DATA SHEET (SDS) (1272/2008/CE)

Trade Name:
POTASSIUM ACETATE

Edition: May 03, 2018
Version: 7/en

6. ACCIDENTAL RELEASE MEASURES

Personal precautions	Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment. For individual protective equipment, refer to section 8.
Environmental precautions	Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains and sewers.
Cleaning methods	If emergency personnel are unavailable, vacuum or carefully scoop up spilt material and place in an appropriate container for disposal. Avoid creating dusty conditions and prevent wind dispersal. Dispose of as special waste according to local and national regulations. Thoroughly clean the floor and objects contaminated by observing environmental regulations. Refer to section 7 for handling directives.

7. HANDLING AND STORAGE

Handling directives	Avoid dust formation during handling. DO NOT INGEST without prior transformation. Avoid all possible sources of ignition (spark or flame). Dry sweeping is not recommended. Do not perform any welding, cutting, drilling or other work that is susceptible to cause heat on or near empty container or transfer equipment until all combustible solids have been removed. Avoid dust accumulation. Pre-wet the material or use a vacuum equipped with high efficiency filter(s). The use of compressed air to clean equipment, clothing, etc. is not recommended. Provide ventilation and/or adequate ventilation in the working area. Refer to section 6 for environmental precautions.
Fire and explosion protection recommendations	Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. NO SMOKING.
Requirements for warehouses and containers	Store in the original container.
Storage information compatibility	Combustible material. Keep away from incompatible materials such as reactive metals and strong acids, or oxidizing agents. Keep away from food, drink and animal feeding stuffs.
Storage recommendations	Store in a tightly closed container in a dry, cool and well-ventilated area.
Storage temperature	< 30°C, not critical. Store away from direct sunlight.
General hygiene	Eating, drinking and smoking in work area is prohibited, wash hands after use and remove contaminated clothing and protective equipment before entering eating areas.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Personal protective equipment must be selected and used according to local laws and regulations. In the EU Personal Protection Equipment are managed through the Council Directive 89/686/EEC.

Professional exposure limits	TWA PEL: No specific exposure limit has been established for this material. For reference, OSHA and ACGIH have established the following limits which are generally recognized for inert or nuisance dust. Particulates Not Otherwise Regulated (PNOR) 15mg/cu. meter.
-------------------------------------	--

SAFETY DATA SHEET (SDS) (1272/2008/CE)

Trade Name:
POTASSIUM ACETATE

Edition: May 03, 2018
Version: 7/en

Recommended monitoring procedures	If this product is present at levels above the exposure limit, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for the determination hazardous substances.
Occupational exposure controls	No special ventilation requirements. Good general ventilation should be sufficient to control airborne levels to an acceptable limit. If the exposure exceeded the limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.
Respiratory protection	A respirator is not needed under normal or intended conditions of product use. Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. 
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Reference should be made to European Standard EN 374. 
Eye protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Reference should be made to European Standard EN 166. 
Body and skin protection	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
General protection and hygiene measures	Avoid dust inhalation. Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the working area.
Technical measures	Provide adequate ventilation, especially in confined areas. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance (physical state & colour)	Low dust white deliquescent powder.
---	-------------------------------------

SAFETY DATA SHEET (SDS) (1272/2008/CE)

Trade Name:
POTASSIUM ACETATE

Edition: May 03, 2018
Version: 7/en

Odour	Odorless or low odor of acetic acid
Odour threshold	Not available
pH <i>Temperature</i> <i>Concentration</i>	7.5 à 9.0 20 °C (5% p/v)
Melting point	292 °C (558 °F) (Decomposition).
Boiling point	Not applicable
Flash point	Not applicable
Evaporation rate	Not applicable
Flammability	Low, however airborne dust may present hazard
Explosive properties	Risks of explosion of the product in presence of mechanical impact: Not applicable. Risks of explosion of the product in presence of static discharge: Not applicable, except for airborne dust. Maximum explosion pressure: Not available. Maximum rate of pressure rise: Not available
Vapour pressure	0 kPa (0 mm Hg) (at 20 °C)
Vapour density	Not applicable
Relative density	Not available
Bulk density	0.48 – 0.61g/mL
Water solubility	253 g/100 ml water
<i>Temperature</i>	20 °C
Note: Freely soluble in cold and hot water. Insoluble in acetone and benzene.	
Partition coefficient (n-octanol/water) (log value)	-3.720
<i>Measure type</i>	Estimated
Auto-ignition temperature	Not available
Decomposition temperature	292 °C (558 °F)
Viscosity	Not available

10. STABILITY AND REACTIVITY

Reactivity	No know reactivity under normal conditions of use.
Stability	Stable
Hazardous reactions	No dangerous reaction known under normal conditions of use.
Conditions to avoid	Avoid all possible sources of ignition (spark or flame).
Materials to avoid	Reactive with strong acids and oxidizing materials. Slightly corrosive with metals.

SAFETY DATA SHEET (SDS) (1272/2008/CE)

Trade Name:
POTASSIUM ACETATE

Edition: May 03, 2018
Version: 7/en

Hazardous decomposition products	Under fire conditions or above decomposition temperature emits carbon monoxide, carbon dioxide, potassium carbonate and potassium oxide. Potassium acetate can burn if heated to decomposition.
---	---

11. TOXICOLOGICAL INFORMATION

Oral toxicity	3250 mg/kg
<i>Test criteria</i>	LD ₅₀
<i>Species used for the test</i>	Rat
Note: No known significant effects or critical hazard.	
Inhalation Toxicity	Not available
<i>Test criteria</i>	
<i>Species used for the test</i>	
Note: No known significant effects or critical hazard.	
Skin toxicity	Not available
<i>Test criteria</i>	
<i>Species used for the test</i>	
Human Experience	No known significant effect or critical hazards.
Skin corrosion/irritation	Slightly hazardous in case of skin contact (irritant) but not sufficient to cause classification.
Serious eye damage/irritation	Slightly hazardous in case of eye contact (irritant) but not sufficient to cause classification.
Skin sensitization	No sensibility reaction observed. Prolonged contact with concentrated solutions may cause redness, drying and cracking of the skin (dermatitis)
Other Toxicity	No known significant effects or critical hazard.
Mutagenicity (germ cell) Reproduction	No known significant effect or critical hazards.
Carcinogenicity	No known significant effect or critical hazards.
Developmental toxicity (maternal and teratotoxicity)	NOAEL (No-observed-adverse-effect level) : Not available
STOT-single exposure	NOAEL (No-observed-adverse-effect level) : Not available
STOT-Repeated exposure	LOAEL (Lowest-observed-adverse-effect level) : Not available

12. ECOLOGICAL INFORMATION

Ecotoxicity	
Toxicity to fish	Not available
<i>Test criteria</i>	
<i>Species used for the test</i>	

SAFETY DATA SHEET (SDS) (1272/2008/CE)

Trade Name:
POTASSIUM ACETATE

Edition: May 03, 2018
Version: 7/en

<i>Exposure time</i>	
Toxicity to daphnies	Not available
<i>Test criteria</i>	
<i>Species used for the test</i>	
<i>Exposure time</i>	
Toxicity to algae	Not available
<i>Test Criteria</i>	
<i>Species used for the test</i>	
<i>Exposure time</i>	
Biodegradability	Readily biodegradable
Persistence	Not persistent
Bioaccumulation	No bioaccumulation potential
Mobility in soil	1.21 (acetic acid)
Note: Acetic acid will partition readily into soil, sediment, or biota. Similarly, acetic acid in these media would tend to move to water or ground-water if available.	
Bioconcentration Coefficient factor (BCF)	Not available
Determination results for PTB properties	PBT (Persistent, Bioaccumulation and toxic) and vPvB (Very Persistent and Very Bioaccumulative) evaluation: Not applicable
Notes: May be harmful to freshwater aquatic species and to plants that are not saline tolerant. This product will contribute to the total Biological Oxygen Demand (BOD).	
Other adverse effects: No known significant effects or critical hazards.	

13. DISPOSAL CONSIDERATIONS

Waste residues information	The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewer. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation, and any national and local authority requirements. Refer to section 7 for handling directives and section 8 for exposure controls and personal protections.
Contaminated packaging	Dispose of as waste residues.
Waste classification	Not classified
European waste catalogue (EWC)	Not classified
Hazardous waste	To the knowledge of the supplier, this product is not regarded as a hazardous waste as defined in the guideline 94/904/EC.
